MEETING PROGRAM

EPA Lead RRP for Sales

**EPA Lead Renovation, Repair & Painting (LRRP) Rule
for owners, sales, estimators, and superintendents**

The information presented will educate the salespersons who are accountable to the client. Even if you choose not to handle this type work, this knowledge will help you to decide the liabilities regarding bid requests and will prove you to be an industry leader. Your sales and estimators will learn how to estimate the cost of applying the rule.

The new EPA Lead Paint Renovator Rule (LRRP or RRP) requires firms to Certify their firm, a \$300 fee and you promise to follow EPA lead jobsite requirements (take on liability). The rule basically applies to structures 1978 and older that have children dwelling in it consistently, and to all homes 1978 & older. Remember, this is not lead paint remediation, it is renovating. If the existing coatings are officially tested lead free or have very minor prep issues you do not need any certifications.

**This class is not Renovator Certification! Nor does it certify your firm!
But we will cover what this means.**
